BERTI

A NAME YOU CAN TRUST

Quality, strength and reliability: the foundations of our work.

Our mission is to offer sturdy, long-lasting equipment designed to minimise the risk of downtime and always ensure the best possible performance in the field.

We are a family that believes in the values of collaboration and trust. Every day, with passion and dedication, we create hundreds of machines designed to meet the genuine needs of those who work the land.

We strictly adhere to the highest quality standards, guided by a strong sense of ethics and the responsibility to provide custom solutions for every client.

We look to the future with energy and determination, ready to evolve so we can stay by your side, with products that continue to make a real difference.

PRUNING RESIDUES

OPTIMAL MANAGEMENT

Pruning residues left in the field, if not properly managed, can obstruct the movement of operators and machinery, and may also serve as a potential source for the spread of serious diseases affecting crop wood. Managing these materials has long been a challenge for farmers.

To address this need, **Berti** has developed a range of

equipment specifically designed to provide a definitive solution for pruning residue management, creating **two lines of mulchers dedicated** to this application.

The first line includes mulchers designed to **finely and uniformly pulverise** the material, with efficiency

significantly higher than traditional mulchers, and then return it to the soil to promote natural decomposition.

The second line consists of mulchers capable of completely **removing the mulched material**, leaving the soil clean and ready for subsequent field operations.

As a result of the **variety of available solutions**, each operator can select the equipment best suited to their operational needs, always ensuring high performance, reliability, and the quality construction that is a hallmark of Berti.

ROTORS

& TOOL HOLDERS

All rotors are manufactured with a double flange, and the tube, produced by extrusion, requires no welding and is therefore seamless – a guarantee of strength and reliability. This manufacturing process provides enhanced resistance to accidental impacts.

Square recess tool holders – why is this better?

When it comes to mulching, each design detail makes a difference. The tool holder is one such detail.

The choice between a hexagonal and a square recess affects not only the shape, it directly affects the holding strength and clamping of the component.

This design feature translates into increased reliability, durability, and operational safety.

The square recess allows for a more precise and stable mechanical connection between the tool (hammer or knife) and the holder.

This means:

- No play between parts, ensuring longer life of the holder-

bolt connection.

- Reduced risk of slippage or rotation of the bolt.
- Greater resistance to dynamic and torsional stresses.

Each Berti rotor is tested and balanced at high speeds to ensure top-quality performance.

PICK-UP ROTOR

WHAT IT DOES

The front **pick-up rotor** lifts pruning residues and **conveys them into the mulching chamber**, ensuring a continuous, uniform flow of material.

Mulchers equipped with a front pick-up are the **ideal solution for working on stony terrain**, where traditional machines cannot operate in safety, and they also perform

well in **wet or otherwise difficult-to-access soils**.

Available optionally in a hydraulic version with speed regulator.

ON THE GROUND OR HARVESTED

MANAGE MULCHED MATERIAL AS YOU WISH

The **Picker range** has been designed to provide operators with **great flexibility in managing pruning residues**, allowing them to choose the solution best suited to their needs.

Material can either be **released directly onto the soil** to promote natural decomposition, **or the wooden residue can**

be completely removed, keeping the ground clean and ready for subsequent operations.

TENSIONER

AUTOMATIC BELT TENSIONER

The mulcher with pick-up system are equipped as standard with an automatic belt tensioner.

This device eliminates the need for manual adjustments, as it automatically compensates for the natural elongation of the belts over time, ensuring consistent power transmission

and reducing routine maintenance.

The automatic tensioner also simplifies belt replacement operations – belts can be removed easily by hand, without tools, making maintenance faster, safer, and more accurate. Reliability, convenience, and uninterrupted operation – three

tangible benefits that reflect Berti's attention to construction details and the real needs of operators.

PICKER®/L

MULCHER FOR VINEYARD AND ORCHARD PRUNING RESIDUES

60 -100 HP

Ø 5 cm

STANDARD EQUIPMENT

- Fixed 3-point linkage, Cat. I.
- Double chassis.
- Top link tie rod.
- Free wheel in the gearbox.
- Pick-up rotor with mechanical transmission through self-lubricating chain.
- Special heavy-duty torque limiter slip clutch in the "Pick-up" rotor's xtransmission.
- Full automatic belt tensioner.
- Rear grid Ø 40 for discharge through, in wear-resistant material.
- Counter blades.
- Forged and hardened BERTI hammers type "P".
- Frontal conveying guards.
- Set steering wheels, pneumatic.
- PTO 540 rpm.
- Accident prevention protections according to EC directives.

ACCESSORIES ON REQUEST

Pick-up rotor
with extra-quantity of teeth

Collecting spikes
kit

Hydraulic transmission
of pick-up rotor and speed regulator

PTO
drive shaft

PICKER®

MULCHER FOR PRUNING RESIDUES

60-120 HP

Ø 8 cm - Ø 15 cm

STANDARD EQUIPMENT

- Fixed 3-point linkage, Cat. I-II.
- Double chassis.
- Top link tie rod.
- Free wheel in the gearbox.
- Pick-up rotor with mechanical transmission through self-lubricating chain.
- Special heavy-duty torque limiter slip clutch in the "Pick-up" rotor's transmission.
- Full automatic belt tensioner.
- Rear discharge through wear-proof grid Ø 60.
- Counter blades.
- Forged and hardened BERTI hammers type "A" or "DF2".
- Frontal conveying guards.
- Set steering wheels, pneumatic.
- PTO 540 rpm.
- Accident prevention protections according to EC directives.

ACCESSORIES ON REQUEST

Pick-up rotor
with extra-quantity of teeth

Collecting spikes
kit

Hydraulic transmission
of pick-up rotor and speed regulator

Forestry rotor
with swinging hammer DF2

Centrifugal clutch
suggested with forestry rotor

PTO
drive shaft

PICKER®/F

MULCHER FOR PRUNING RESIDUES

80-140 HP

Ø 8 cm - Ø 15 cm

STANDARD EQUIPMENT

- Fixed 3-point linkage, Cat. I-II.
- Double chassis.
- Setup for Front/Push application, only.
- Gearbox with double free wheel and through shaft.
- Pick-up rotor with hydraulic transmission through self-lubricating chain with speed-adjusting valve.
- Rear discharge through wear-proof grid Ø 60.
- Counter blades.
- Full automatic belt tensioner.
- Rear roller Ø 159, height adjustable, with scraper.
- Forged and hardened BERTI hammers type "A" or "DF2".
- Frontal conveying guards.
- Front rubber wheels, height adjustable.
- PTO 1000 rpm (PTO 540 rpm on request).
- Accident prevention protections according to EC directives.

ACCESSORIES ON REQUEST

Pick-up rotor
with extra-quantity of teeth

Collecting spikes
kit

Fixed rubber wheels
in lieu of rear roller

Forestry rotor
with swinging hammer DF2

Centrifugal clutch
suggested with forestry rotor

Hydraulic adjustment
of upper pick-up's hood

PTO
drive shaft

PICKER®/FR

MULCHER FOR PRUNING RESIDUES

80-160 HP

Ø 8 cm - Ø 15 cm

STANDARD EQUIPMENT

- Fixed 3-point linkage, Cat. I-II.
- Double chassis.
- Setup for Front/Push application, from factory.
- Gearbox with Double free wheel and through shaft (1" 3/4 Z6).
- Pick-up rotor with mechanical transmission through self-lubricating chain.
- **Kit no stop pick-up (12V).**
- Hydraulic (floating) adjustment of the upper pick-up rotor.
- Manometer with pick-up pressure indication.
- Forged and hardened BERTI hammers type "A".
- Rear discharge through wear-proof grid Ø 60.
- Counter blades. imbullonate.
- Full automatic belt tensioner.
- Frontal conveying guards.

ACCESSORIES ON REQUEST

Pick-up rotor
with extra-quantity of teeth

Collecting spikes
kit

Double 3-point linkage
CAT. I e II

Forestry rotor
Smooth Cut with tooth XF1

Centrifugal clutch
suggested with forestry rotor

PTO
drive shaft

PICKER®/C

MULCHER FOR PRUNING RESIDUES

60-140 HP

Ø 8 cm - Ø 15 cm

STANDARD EQUIPMENT

- Fixed 3-point linkage, Cat. I-II.
- Double chassis.
- Top link tie rod.
- Exclusive BERTI container with hydraulic tipping frame.
- Free wheel in the gearbox.
- Pick-up rotor with mechanical transmission through self-lubricating chain.
- Special heavy-duty torque limiter slip clutch in the "Pick-up" rotor's transmission.
- Full automatic belt tensioner.
- Pivoting rubber wheels, with hydraulic height adjustment.
- Counter blades.
- Forged and hardened BERTI hammers type "A" or "DF2".
- Rear lights for travel on road.
- Frontal conveying guards.
- PTO 540 rpm.
- Accident prevention protections according to EC directives.

ACCESSORIES ON REQUEST

Pick-up rotor
with extra-quantity of teeth

Collecting spikes
kit

Steering/articulated 3-point linkage kit
c/w wide-angle drive shaft

Hydraulic transmission
of pick-up rotor and speed regulator

Refining kit
for further mulching wooden residues

Forestry rotor
with swinging hammer DF2

Centrifugal clutch
recommended with forestry rotor

PTO
drive shaft

PICKER®/R

MULCHER FOR PRUNING RESIDUES

60-140 HP

Ø 8 cm - Ø 15 cm

STANDARD EQUIPMENT

- Fixed 3-point linkage, Cat. I-II.
- Double chassis.
- Top link tie rod.
- Exclusive BERTI chute-conveyor, towards the rear.
- Hydraulic deflector with hoses and quick couplings.
- Free wheel in the gearbox.
- Pick-up rotor with mechanical transmission through self-lubricating chain.
- Special heavy-duty torque limiter slip clutch in the "Pick-up" rotor's transmission.
- Full automatic belt tensioner.
- Pivoting pneumatic wheels with mechanical height adjustment.
- Hook for trailer (suited for 2 axels trailers, only).
- Counter blades.
- Forged and hardened BERTI hammers type "A" or "DF2".
- Frontal conveying guards.
- PTO 540 rpm.
- Accident prevention protections according to EC directives.

ACCESSORIES ON REQUEST

drive shaft

PICKER®/KARGO

MULCHER FOR PRUNING RESIDUES

60-140 HP

Ø 8 cm - Ø 15 cm

STANDARD EQUIPMENT

- Exclusive BERTI container with hydraulic tipping frame.
- Double chassis.
- Tow-bar linkage with hydraulic top link for height adjusting.
- Free wheel in the gearbox.
- "Pick-up" rotor transmission through automatic chain adjusting.
- Counter blades.
- Special heavy-duty torque limiter slip clutch in the "Pick-up" rotor's transmission.
- Full automatic belt tensioner.
- Axle of trailer with fixed wheels.
- Parking brake (mechanical).
- Hydraulic braking system.
- Type-approved for transport on road (Italy).
- Rear roller Ø 194, height adjustable, with scraper.
- Forged and hardened BERTI hammers type "A" or "DF2".
- Frontal conveying guards.
- PTO drive shaft with Wide Angle Joint (tractor side).
- PTO 540 rpm.
- Accident prevention protections according to EC directives.
